✍ ABOUT ME

I have a Bachelor's degree in Computer Engineering (Software) and am fluent in Java and JavaScript. With hands-on experience in Next.js, Tailwind CSS, Express.js, and Spring Boot, I have developed systems.

I have been working with Java and JavaScript for over a year

Such as:

Safarinoo 🔗 : A full-stack travel booking system built with React.js, Node.js, Express.js, MongoDB, and MVC architecture.

Airplane System 🔗 : A secure planning system designed with Java, Spring Boot, and PostgreSQL, Spring Security, Spring Data Jpa, featuring token-based authentication with a 12-hour expiry.

Echo 🔗 : Echo is a dynamic and fully responsive social network built with Next.js and powered by Prisma for seamless backend queries. Designed as a complete web application, it delivers a smooth and engaging user experience, combining speed, efficiency, and modern design.

Both systems include dedicated admin panels, and you can explore all my work on my GitHub.

I specialize in turning Figma designs into functional applications and thrive on learning and solving new challenges in software development.

Deadline 🔗 : I am currently working on a strong project whose system is close to freelance systems and is designed analytically and I am working on DB First. In this project, I have currently used clean architecture and have used Java and the Spring Boot framework. I am also developing the front end with my colleague, which is being written with Next JS. We hope to complete this project with motivation so that we can develop it. I plan to release its initial version in a few months.

visit echo: **click here** 🔗 (Be sure to turn on your VPN to use the application)

visit Deadline: **click here** 🔗

I am extremely passionate about growing in the backend development field and continuing my journey in this domain.

PRO SKILLS - BACKEND

Java
Java Core
SpringBoot FrameWork
Spring Security
Spring Data JPA
Hibernate
Gradle
Maven
Java Script
Express.js
Node.js
N-Layered Architecture
Clean Architecture
MVC Architecture
Python

OTHER SKILLS FRONTEND

- Next.js
- Tailwind
- Axios
- Type Script
- Context API
- Routing
- Wordpress
- Icdl

PRO SKILLS - BACKEND

Rest Api
Linux
System analysis and design
MongoDB
Postgresql
MySQL
Git
OOP principles
Docker
Solid principles
Postman API
Agile Development

- React.js
- Bootstrap
- Responsive Design
- Figma
- Rest Api
- Agile && Scrum
- Seo
- Angular
